

THE AI READINESS FIELD GUIDE

CONFIDENCE THROUGH CLARITY

DESTINATION
AI READINESS

GOAL

Move from experimentation to confident action

When clarity turns into momentum:

- ✓ Teams act on insights
- ✓ Automation reduces friction
- ✓ AI scales what's already working

CONFIDENCE

The signal of true readiness

- ✓ Explainable outputs
- ✓ Clear accountability
- ✓ Feedback loops for correction
- ✓ Realistic expectations

PEOPLE

Who the system is built for

- ✓ Clear ownership of decisions
- ✓ Frontline teams involved early
- ✓ Training focused on "why," not just "how"
- ✓ AI supports judgment, it doesn't replace it

PROCESS

How the work actually happens

- ✓ Real workflows, not ideal diagrams
- ✓ Defined data ownership and standards
- ✓ Stable, monitored integrations
- ✓ Metrics tied to outcomes, not activity

START HERE

Where most teams begin

- ✓ AI interest is high
- ✓ Pilots are active
- ✓ Confidence is uneven

AI readiness isn't about more technology.
It's about people, process, and confidence.
